

BALL RUN

URBAN PLAY

REIMAGINED

Turning public spaces into playful destinations

IMAGINE...

What if the streets of your city were genuinely fun to explore? Ball Run is a new urban entertainment concept that installs large-scale, interactive ball run sculptures across towns and city centres — turning everyday journeys into shared adventures that bring communities together, drive footfall into local businesses, and create lasting memories for residents and visitors alike.

WHAT IS A BALL RUN?

Ball Runs are interactive installations where wooden balls travel through sculpted wooden and metal channels, obstacles and mechanical features. Part kinetic sculpture, part play experience, part social attraction — they transform ordinary public spaces into memorable shared experiences.

Designed for all the family, Ball Runs encourage participation, curiosity, movement and repeat interaction. They are instantly understandable, require no screens or technology, and are accessible to all ages and physical abilities.

PROVEN SUCCESS.

Ball Runs are not a new idea — they have been hugely popular across Switzerland and wider Europe for years. Green Play Project, our design and build partner, has now brought them to the UK, delivering installations at leading visitor attractions including The Eden Project and Forestry Commission sites.

The results speak for themselves. At Alice Holt, a royal forest in Hampshire:

- Over 40,000 sustainable wooden balls sold in under 12 months
- 12% of all visitors purchased a ball
- Visitor numbers increased by 15% since installation

Ball Run is now taking this proven concept into an environment with even greater potential: towns and city centres.

**IN TOWNS
& CITIES.**

THE URBAN OPPORTUNITY.

Cities offer everything that made Ball Runs successful at visitor attractions — and more. Urban environments bring:

- › Significantly higher daily footfall from both residents and visitors
- › Year-round accessibility regardless of season
- › Greater opportunities for spontaneous, repeat interaction
- › Stronger social media visibility and organic content generation
- › Wider community reach across schools, families and local groups

By installing Ball Runs — individual interactive nodes — across a town or city centre, we will create a trail that gamifies the walking experience. Each Ball Run is a destination in itself, drawing people deeper into the area, encouraging them to explore, dwell and spend.

Ball Runs can also help reclaim underused or challenging public spaces — replacing anti-social behaviour with positive footfall, visibility and community interaction.

FOOTFALL & COMMERCIAL IMPACT.

A Ball Run installation has the potential to:

- › Create a unique new reason for families and visitors to come into the area
- › Increase dwell time by providing repeated points of engagement along a trail
- › Drive measurable footfall directly into participating shops and venues hosting Ball Stations
- › Strengthen the area's reputation as a family-friendly, distinctive destination

- › Generate organic social media content that extends marketing reach
- › Provide schools and community groups with a new, accessible outdoor activity

For nearby cafés, restaurants, shops and attractions, the spillover effect of increased footfall and longer visits translates directly into additional spend.

REVENUE OPPORTUNITY THE WOODEN BALL MODEL.

The wooden balls are central to the experience — and to the commercial model. Visitors purchase a ball to use across the installations, taking it home as a keepsake, souvenir or collectible.

Balls are supplied by Ball Run at £3 + VAT per ball, covering manufacture, distribution and the ongoing maintenance and repair of the installations. We recommend partner venues sell balls to the public at £6 (inc. VAT), generating a meaningful margin on every sale.

Branded balls can carry partner logos, city branding or seasonal designs, making them:

- › **Part activity — used throughout the installations**
- › **Part souvenir — taken home as a memento of the experience**
- › **Part collectible — driving repeat purchases and return visits**
- › **Part marketing tool — carrying your brand into homes and beyond**

Ball sales create a direct, ongoing revenue stream for partner venues throughout the duration of the installation — with the potential for significant volume in high-footfall locations.

SOCIAL MEDIA & MARKETING BENEFITS.

Kinetic installations are inherently captivating on video. A ball travelling through a sculpted run is the kind of content that stops the scroll — and Ball Runs consistently generate high levels of organic, user-generated content across TikTok, Instagram and YouTube.

This translates into:

- Cost-free viral marketing for the area and its partners
- Shareable 'Instagram moments' that increase awareness and drive new visitors
- Opportunities for behind-the-scenes and educational content around design and engineering
- Ongoing digital visibility long after the installation is live

OUR PARTNERS.

Ball Run brings together three specialist organisations to deliver installations at the highest level. Together, we bring the design, the craft, the infrastructure — and the vision — to make this happen.

GREEN PLAY PROJECT
greenplayproject.co.uk

With 20 years of experience building sustainable natural play spaces, Green Play Project are the designers and builders behind the UK's first giant ball run trails. They have delivered installations at The Eden Project and Forestry Commission sites and are specialists in bespoke play environments for public and urban spaces.

THE WOODEN BALL COMPANY **thewoodenballcompany.com**

The UK's specialist manufacturer of sustainable wooden balls, made using sustainably grown UK timber in a fully solar-powered workshop in Somerset. Balls are precision-made with in-house machinery to ensure consistent quality, with custom branding options available for retail and place-based marketing.

BALL RUN **ballrun.co.uk**

Ball Run originates the urban ball run concept in the UK, connecting cities, councils and businesses with world-class partners and delivering end-to-end installation, operation and partnership management. We are focused on long-term impact, community benefit and commercial success.

PLANNING, PERMISSIONS & PROCESS.

We understand that installing in public spaces often involves navigating planning and permissions, and we manage this process as part of our end-to-end service. Our team works with local authorities, landowners and business improvement districts to ensure installations meet all necessary requirements and are designed sensitively for each location.

NEXT STEPS.

Once you express interest, here is what the process looks like:

- > **Initial conversation** — we discuss your location, ambitions, goals and budgets
- > **Site assessment** — we visit and assess potential Ball Run locations across the area
- > **Concept proposal** — we develop a tailored proposal including installation design, trail layout and commercial model
- > **Partnership agreement** — we agree terms, branding and ball pricing with all partners
- > **Design and build** — Green Play (sometimes in collaboration with local artists, designers or community/cultural organisations) designs and installs the Ball Runs
- > **Launch and activation** — we support the public launch with marketing assets and content
- > **Ongoing operation** — we supply balls, maintain installations and support partners throughout

BECOME A FOUNDING PARTNER.

We are at an exciting moment — actively seeking the founding city partners who will help shape what urban ball runs look and feel like in the UK. As a founding partner, you will have a genuine role in co-creating the concept for your city, and the opportunity to be first in your region with an exciting, new public attraction.

If you believe your city should be more playful, we would love to hear from you.
